

ENVIRO-PRO
Professional Pest Management

Friday, March 20, 2020

Good Afternoon Enviro-Pro Clientele:

I would like to take the opportunity to address the **Coronavirus (COVID-19)** with respect to your pest control services that we have been providing.

We have, and always will be, a forward-thinking company when it comes to all concerns of both our clientele and employees. We, as a nation, are facing a very unusual health-threat at this time. It is my responsibility to protect the health and well-being of both you, and our employees.

We are going to implement a short-term (minimum 60 days) change to our protocols of all INTERIOR services starting today March 20, 2020.

What does this mean for you: Service from a distance.

Enviro-Pro will continue to schedule all services as you are accustomed to. We will be performing all services due in a thorough and professional manner from the **Exterior** of your homes **ONLY** during this time period. In the event we are unable to access the interior of your home or business, we will continue to provide protection to the exterior areas to proactively prevent pests from entering.

This will include all Pest Control Services & Mosquito Services, and any other services that can be performed from the exterior of your homes.

Thank you all personally for understanding that this decision was based upon your safety and my employees safety only. Please contact me should you have any questions or concerns regarding this most unusual decision that I felt necessary to make.

Stay Healthy & Safe
Thank you in advance,

L Nankishore
President
